

Latency

Energy

Mean $\pm$ SD over eight trials per configuration, consecutive within one battery session, on battery, performance governor. Latency SD < 0.6% of mean throughout.

Mean latency difference 153.1 ms (95% CI 151.3–154.9) at 640 and 652.4 ms (645.0–659.7) at 1280; energy 1.77 J (1.72–1.81) and 7.59 J (7.42–7.75). Zero throttling events in 32 trials.
